DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/13/08 has been entered.

Allowable Subject Matter

Claims 1, 3-8, and 10-15 are allowed.

Claims 1, 3-8, and 10-15 are allowable over the prior art of record, none of the prior art whether together singularly or in combination to teach the claimed combination as recited. The closest reference "Real-Time LWD: Logging for Drilling" by Bargach et al. does not disclose or suggest the improvement of the instant application comprising correlation displaying a matrix having a header row defining possible causes in order to determine whether there has been a significant change in the parameter, and a header column defining the major formation parameter made by the logging sensors, a cell existing for every possible correlation identified between the observed effect and the probable casual event; and analyzing the casual event and changes for the wellbore interval based on the displayed matrix. Bargach et al.'s reference teaches time-lapse data, e.g., time-lapse GeoVISION resistivity images, obtaining during drilling for correlation in monitoring dynamic processes affecting a borehole.

In addition, reference US Patent No. 6,272,434, cited in the International Search Report, does not teach those limitations above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
